IAEE Sofia Symposium

"Southeast European Energy Challenges and Opportunities"

6 - 7 December 2018, Sofia, Bulgaria

SEE> 2018

Are you ready to discuss below topics & meet experts from all around the world ?

Can Southeast Europe continue to rely on oil, coal, and gas and meet the de-carbonization policy goals?

How do renewable energy sources contribute to de-carbonization at reasonable cost?

Is there a single vision for financing availability of large power plants?

Is it possible to finance new generation without direct subsidies?

What is needed in order to attract new investments in power capacities?

Is Southeast Europe going to suffer segmentation because of the uneven patterns of change and their consequences for the industry's subsectors?

Financing New Power Generation in Liberalized Regional Electricity Markets

What is the outlook for nuclear?

How are costly blunders to be avoided in an environment of changing supply and demand patterns and risks?

Is the energy industry in Southeast Europe capable of matching the pace of change and stay competitive?

Economics of the Network Energy Sectors (Electricity, Gas, District Heating)

De-carbonization of the Energy Sector: Impacts in Southeast Europe

What are the opportunities that exist and should be supported in order to tap in the synergies of Southeast Europe's energy?

Are the energy markets in the region really open, transparent, unrestricted and competitive?

What advantages and disadvantages face the public and private companies based in the region vs. those based elsewhere in the world that are also active in Southeast Europe?

Southeast Europe: Crossroads of Energy, Economics and Geopolitics
