

IAEE European PhD-students Day
August 18, 2013, 11 am – 4.45 pm

*Location: Centre for Innovative Energy Systems, University of
Applied Sciences, Georg-Glock-Str. 3, 40474 Düsseldorf
(see next page for a map)*

Six speakers will present their work in this special session. Each speaker will get 30 minutes to present his/her work, followed by 15 minutes for questions and answers from the audience (including a 5-10 minutes feedback from two referees). Lunch will be served to all participants.

11h00 – 11h05 Welcome word

11h05 – 12h35 Session 1

Christophe Neumann

Price formation of exhaustible resources.

Lion Hirth

The optimal share of variable renewables.

12h35 – 13h15 Lunch

13h5 – 14h45 Session 2

Melanie Houllier

Germany's Energy Transition and European Electricity
Market Integration.

Richard Scharff

Distributed balancing of wind power forecast deviations by
intraday trading and internal ex-ante self-balancing - a
modeling approach.

14h45 – 15h15 Break

15h15 – 16h45 Session 3

Hanspeter Höschle

Capacity mechanisms driving dynamic capacity investment
decision making with increased renewable energy sources.

He Pan

The role of personality traits in renewable energy technology
adoption: a case study from China
