Overview of Solid Minerals Mining in Nigeria

Presenter: Hamza Aliyu Daneji

Department of Petroleum Resources, Nigeria

Abstract

As Africa’s leading crude oil producer (accounting about 22% of African and about 2.6% of total world crude production), oil revenue accounted for about 66% of Government revenue, and the decrease in oil prices contributed to a dramatic reduction in the Government’s revenue from oil (which was about $22 billion in 2009 compared with $55 billion in 2008)\(^1\). To diversify the oil-based economy, Government policy continued to promote investment in the exploration for and the development of solid minerals (as opposed to natural gas and oil). Non-oil exports in 2009 were provisionally valued at about $1.9 billion\(^2\).

The Federal Government holds all mineral rights and is responsible for the allocation of exploration and development licenses. This presentation aims at providing a brief introduction of the Solid Minerals availability and the government’s regulatory structure and policy towards solid minerals exploration.

**Keywords:** Nigeria, Solid Minerals, Mining, Regulatory Structure and Policy.
